VOLUME V, NUMBER 50 THE GOLD CENTER THE NEVADA CITY NUGGET, CALIFORNIA THE COUNTY SEAT PAPER FRIDAY, DEC. 25, 1931.

MINING ASS'N. OF CALIF. MET SAT.

The Mining Association of California met last Saturday at the Travelers Hotel in Sacramento beginning at 10:30 A. M. Luncheon was held at the hotel at noon and the session continued into the afternoon.

President Errol MacBoyle reported that he was making excellent progress with raising finances toward getting a paid secretary who should spend much of his time in the different districts. This met with general approval and it is expected that shortly after the first o fthe year will see a new secretary.

It was expected that Mr. Vandergrift would speak. He was unable to be present but sent one of his assistants who explained the state finances.

Another speaker was Mr. Fry of the Industrial Accident Commission who advocated Safety First for the Mines. His work is often confused with that of State Compensation Insurance Fund and he was asked many questions he could not answer in regard to compensation insurance His reply was, Cut down your mine accidents.

Chas L. Gilmore, whom the Association had endorsed for the position of State Mineralogist withdrew his application for that position owing to the pressure of personal business. The position is yet unfilled altho many applications were made.

It is planed to have a Legislative Committee to prepare drafts of bills to present before the next session of the state legislature.

On account of the proximity to the holidays and the short notice sent out there was not as large a crowd as last year but another general meeting is planned for soon after the first of the year.

HOGE DEV. COMPANY MAKING GOOD PROGRESS

The Hoge Development Company mine is down about 600 feet. The ore encountered at this depth is assaying at about the same value as that on the 300 level, which was about $28 a ton.

The company is drifting west on the 600 level, and the ledge is from two to five feet wide.

Drifting is also going on on the 450 level where the ore is making as good a showing as on the other two levels.

They are making plans for the mill which will be installed in the early spring.

Nevada City is watching this mine with keen interest as the superintendent, Mr. A. M. Hoge, is one of its most prominent citizens. He has spent many years in mining operations and all feel that he has at last achieved his goal in bringing in a real gold mine.

CHAS. HUY RECIEVES DESERVED ADVANCEMENT

Mr. and Mrs. Joseph Huy of Nevada City have received word their son, Charles Huy, has been made advertising and publicity man for the new Paramount Theater at 12th and Broadway, Oakland. The theater was recently completed at a cost of $3,000,000, with a seating capacity of 3,500.

Mr. Huy has been in the employ of the company for some time and the new position is a deserved promotion for faithful and efficient service. He is a graduate of Nevada City high school and has many friends in this city who are pleased to learn of his promotion.

20-STAMP MILL IS DESTROYED BY FIRE

The twenty-stamp mill at the Yuba Mine eight miles up the South Yuba River near Washington, in Nevada County, was burned to the ground recently. The fire is believed to have been caused by parties who took refuge in the building during the recent stormy weather.

The mill was built about 40 years ago. The mine has been inactive for a number of years.

AMERICAN MINING LAW WORTHY CONTRIBUTION

Among the most frequent subjects of inquiry addressed to the State Mineralogist and members of his staff are questions involving the statutes, decisions, and rulings of the courts and the United States Land Department relating to mineral locations, their development, and maintenance.

What is commonly thought of and referred to in speaking of the "American Mining Law" is the system which has developed, now in considerable part of judicial interpretations by the courts and the land department, based upon a relatively few federal statutes supplemented by statutes of certain of the western "mining" states. It is also relatively young—the first federal act being that of July, 1866, which was preceded by the local rules and customs adopted and utilized in the verious western mining camps and districts in the fifties and sixties. While the federal mining statutes apply specifically only to the western public land states (with certain exceptions), there is much in the judicial decisions of many of the other states relating to property rights and contractual relations that have distinct bearing upon the maintenance and conduct of mining operations.

Since the classic treatise of Curtis Lindley and the earlier work of Gregory Yale (both of San Francisco), followed by those of Shamel, Morrison, Costigan, and Ricketts, many disputed and uncertain points have been adjudicated; and in addition the federal and certain state leasing acts have been put upon the statute books dealing with mineral resources.

Because of the multiplicity and frequency of the inquiries above noted, the Division of Mines of the State Department of Natural Resources arranged with Mr. A. H. Ricketts of the San Francisco Bar for the preparation of a comprehensive and detailed yet concise and plain-reading exposition of the American mining law as now recognized and interpreted. This is now available as Bulletin 98 of the State Division of Mines. The form of presentation is original with Mr. Ricketts and follows that adopted by him in his earlier work (1911) which was privately published. By stating the subject matter and the principle or arguments succintly, briefly, and topically, coupled with citations to and excerpts from the full-text decisions, it is intended and expected that the volume will prove highly useful and valuable, both to the layman and the lawyer, to the miner, and to the engineer. A section of the appendix is devoted to legal forms.

This Bulletin 98, "American Mining Law", is a work of 810 pages, bound in flexible leather, and may be obtained at $2.00 per copy postpaid, by applying or writing to any of the offices of the State Division of Mines: Ferry Building, San Francisco; Bankers Building, 629 South Hill Street, Los Angeles; Room 320, State Office Building, Sacramento; care Chamber of Commerce, Redding; or the offices of the Division of Oil and Gas at Taft, Bakersfield, Coalinga, Santa Barbara, and Santa Paula.

JOHN HITCHENS PASSES AFTER LONG ILLNESS

John A. Hitchins, formerly of Nevada City, passed away Saturday in Sacramento of an incurable malady of long, painful duration. Mr. Hitchins and wife went to Sacramento recently to receive medical care and he passed away at his daughter's home.

He was born in Michigan coming to Nevada City when a young man. Mr. Hitchins followed the occupation of miner in which work he became a skilled and valued employee.

Left to mourn his passing are a loving wife, five daughters, Mrs. Fred Tremaine, Mrs. Luis Isham, Mrs. Alma Chapman, Mrs. Burr Snyder, Mrs. Howard Harris, and a son, Alfred Hitchins, all of Sacramento; two sisters, Mrs. M. Newman and Mrs. Lillie Eddy of San Francisco, also a brother, George Hitchins, of Nevada City.

He was an old and honored member of Oustomah Lodge, No. 16, I. O. O. F., of Nevada City. The funeral was held in Sacramento Monday.

BOOST SIERRA NEVADA RANGE

The eastern section of California, the Sierra Nevada Range, once so famous and to which the State owes so much, appears to have been utterly forgotten, although its resources are by no means exhausted. It would seem that the development of this region should be one of the major tasks of the people of the valleys and cities, for the more the back country is made productive the more active their business and the more will the other parts of the State grow and prosper.

Within the boundaries of the mountain counties, at an elevation of around 2,000 feet, there are numerous non-metallic deposits which, if favored more liberally by the people of the Coast and Valley cities and towns would be a source of income and provide employment to the mountaineers, who, in turn, could thereby increase their buying power.

There are numerous buildings in the larger cities of California, including San Francisco, Oakland, Sacramento and Stockton, as well as smaller towns, in the construction of which marble from other states of the Union and lumber, lime and cement from without the boundaries of California have been used. All such products of the earth and many more are obtainable in the mountain counties of this State, particularly Tuolumne and Calaveras counties. Many deposits of talc, clay, pumice, chrome, quartz, ochre, soapstone, etc., lie in their virgin state awaiting development.

In Tuolumne County, near the historic town of Columbia, the Columbia Marble Company has operated continuously for more than a half century. Columbia marble is 99.5 per cent carbonate lime and is mined in several colors—white, veined, black, blue, and buff The Columbia marble quarry alone could supply all demands for marble in California, if favored with the patronage of its people. There is absolutely no need of importing out-of-state marble.

A short distance from Sonora the United States Lime Products Corporation operates a lime quarry and manufactures all kinds of lime and by-products. With a force of 35 men, the quarry and plant are at present operating at about 25 per cent normal.

Not far from Jamestown John C. Witney of that town is operating a slate quarry, the products of which are particularly well adapted to the manufacture of roofing and other purposes. The plant is equipped to handle a great volume of business.

At Tuolumne, Standard City and other towns in Tuolumne County there are lumber plants capable of supplying all the needs of Californians in that line of industry.

In Calaveras County, near the town of Angels Camp, the Pacific Mineral Company, Ltd., is running its plant three shifts daily in the manufacture of amphibolite schist for roofing.

In the neighborhood of San Andreas, the Calaveras Cement Company, with a capacity of 4,000 barrels daily, is operating at present at 50 per cent normal. It produces one of the best cements manufactured anywhere. Its plastic early hardening product, recently developed, constitutes a marked advance in the porduction of a cement superior in quality. It meets all the economic demands of the present age.

In addition to the above mentioned, there are numerous other plants in the Sierra Nevada Range engaged in the production of various non-metallics which are in a position to meet all the needs of the Coast and Valley cities and towns for building and many other purposes.

If the people of the centers of population can be made to realize that as long as the resources of the mountains are overlooked only a part of California is being developed and that they are, so to speak, throwing away a valuable asset, they will not only favor the industries of the Sierra Nevada Range but will turn their attention to its vast possibilities, increasing its population and thereby its purchasing power, and instead of a partial development, as at present, inaugurate a period of healthy and complete utilization of its potentialities.

MRS KIMBALL RECIEVES ACCIDENT INS. POLICIES

Mrs. Roy Kimball, who is administratrix of the estate of her late husband, Roy E. Kimball, received the sum of $3,000 thru a pedestrian and accident policy carried by her husband thru the agency of a Sacramento newspaper.

He was accidentally killed in 1930 when an auto stage he was riding in collided with a truck near Pinole. His wife recently compromised the suit with the stage company and received $17,000.

The Kimballs lived in Nevada City several years ago on Upper Broad Street. The widow still holds important mining property near Alleghany.

Her many Nevada City friends congratulate her on the winning of the suits.

DELHI MINE MAKES RAPID DEVELOPMENT

Development operations at the Delhi Mine, three miles from North Columbia, on the Middle Fork of the Yuba River, are being pushed forward by a crew of five men, under the supervision of T. H. Hilbron.

The main or lower tunnel is in 2,000 feet, and is being pushed ahead rapidly. Indications are that the old St. Gothard ledge will be encountered in the next forty of ffty feet. This will give approximately 1,800 feet of backs. The St. Gothard ledge was a very rich mine in its day Mine, was a very rich property in its day, but on account of too much water, never was worked to any great depth.

The Old Delhi Mine turned out a record of millions in production in great depth.

This property belongs to the Nonneman estate and an option was given Mr. Hilbron.

No effort will be made at this time to pump out the old shaft but they are extending the lower tunnel.

LOCAL PEOPLE ATTEND FORESTERS MEETING

Mr. and Mrs. L. S. Smith, Earl E. Bachman and W. M. Gracey of Nevada City were visitors in San Francisco on Wednesday and Thursday of this week to attend the annual meeting and banquet of the California section of the Society of American Foresters.

Attending the sessions which was esters from all sections held at the Hotel Bellevue were foresters from all sections of the state. Among the topics discussed were fire control, water conservation, reforsetration and all other problems of forest conservation.

Speakers on the program were W. S. Rosecrans of Los Angeles, Major L. T. Farley, state fish and game commission; Burnett Sanford, State Division of Forestry; T. L. Stanley, manager of the Shasta-Cascade Wonderland Association and A. W. Sampson of the Forestry School of the University of California.

Mr. and Mrs. Smith plan on remaining in San Francisco for several days before returning to Nevada City

RALPH FORTIER DIES AFTER LONG ILLNESS

Many friends and relatives gathered in St. Canice's Catholic church Saturday morning to attend a solemn requiem high mass celebrated by Father O'Reilly for the repose of the soul of the late Ralph Fortier, who passed last week at the home of his mother in this city, after several months of illness.

He grew to young manhood here and the high esteem in which he was held was evidenced by the large assemblage of people and many beautiful floral offerings.

After completing his college course and being licensed by the state he was employed by the Owl Drug Store for a number of years, and then he worked for his brother, George, in his pharmacy in Pacific Grove. He was also employed at Los Angeles.

Those left to mourn his passing are his mother, Mrs. George Fortier of this city; and two brothers, G. J. Fortier of Pacific Grove, and John J. Fortier of Nevada City. There are also aunts, Mrs. T. H. Limnell and Mrs. Wm. Hogan, a niece Miss Gertrude Howarth, and a cousin, J. J. Murphy.

MISS PATTERSON AND COLIN TAMBLYN ARE WED

At a quiet wedding at the Methodist parsonage last Monday Miss Irene Patterson of Washington and Colin Tamblyn of Nevada City were united in marriage by Rev. H. H. Buckner. Witnesses to the ceremony were the groom's sister, Mrs. N. Robbins, and Mrs. H. H. Buckner.

The bride has been residing in Washington for some time and has made many friends during her stay.

Mr. Tamblyn is the blacksmith at the Spanish Mine and a sterling young man of Nevada City.

COMPENSATION RATE BOOSTED

NEW RATE TO BE $10.99

Announcement has been made that the new compensation rate for mines was to be raised to $10.99 after January 1st as against the high rate of $10.54 for the past nine months. Furthermore the mining men have no assurance that the rate will not be raised again before the close of the coming year.

The finger of scorn is pointed at the State Compensation Insurance Fund, but they in turn protest that they have only one vote in seven in setting the rate. The rate is set by the Insurance Board which basis the rate upon the past experience of the particular group under consideration, and then tags on a lot of other charges similar to cover charges in certain restaurants. The poor laymen ask how and why and wherefore for failing to receive satisfactory answers except that which the Powers That Be desire them to know.

The Industrial Accident Commission admonishes the mines to cut down on their accidents. The mines ask for more adequate mine inspection. The state says, "No money". It seems that the louder the miners cry for relief the harder they are hit. Perhaps to teach them to be good bys and not cry when they are hurt.

THREE RELATIVES DIE SHORTLY AFTER REUNION

Three deaths of relatives within a few days after a reunion in the southern limits of Nevada City, makes the second remarkable coincidence of its kind in recent months with a local connection.

Three sisters, all reared together in their childhood, met at the home of Mrs. Fred Hepner of Nevada City recently. The occasion was a visit of Mrs. Emma W. Hill, 58, of Christian Valley and Mrs. May Naomi Watters, 60, of Burlingame, sisters to Mrs. Hepner, 59, who was ill. Today all are dead.

Mrs. Hepner, the first to die, was buried a week ago last Monday. Mrs. Hill was buried last Monday afternon in Dutch Flat. She died on Saturday, within twenty-four hours after the death of her sister, Mrs. Watters, in Burlingame.

The deceased sisters have a brother, Frank Wilkerson, who resides in Auburn. Mrs. Hill left a husband, David Hill of Christian Valley; a son, Orval Baker of Drum, and a daughter, Maragaret Hill of Auburn.

Mrs. Hepner leaves a husband, Fred J. Hepner, and two daughters. Mr. Hepner is seriously ill at the Jones Memorial Hospital in Grass Valley.

The first remarkable coincidental series of deaths was in August of this year. On the morning of August 17th, Henry C. Schroeder, Nevada County assessor, John Mulroy, justice of the peace, and Jerome Geronomi, well known employee of the Nevada County Narrow Gauge Railroad, died unexpectedly.

BUTTE PROPERTY GRAVEL WASHING UNDER WAY

Word comes from Oroville that washing of gravel production at the Henly Mine at Morris Ravine is now in progress on a large scale.

This property is operated by J. M. McClung and associates of this city. It includes gravel deposits in what is known as the South Table Mountain, and embraces a deposit called the beach line of the ancient Sacramento valley ocean.

The owners of the property report very satisfactory results from their developments, and assure a large field for exploitation.

NATIONAL HOTEL HAS HAPPY CHRISTMAS CELEBRATION

The National Hotel, Mr. and Mrs. Fred Worth, proprietors, had a beautiful Christmas tree and sang Christmas carols with Mrs. Simpson at the piano. Gifts and candy were distributed to their employees.

The little entertainment was greatly enjoyed by all present.

MERRY CHRISTMAS

The Nugget wishes its many readers a Merry Christmas We hope that the New Year will bring prosperity to all. In the meantime it behooves us to be of good cheer even tho it is hard to do so at times. No matter how hard we think things are there is always someone worse off than we are. We must have the winter storms to bring the green grass in the spring.

Our advertisers have been most generous thru the Christmas season and we appreciate this business. It is our Christmas present and we are duly greatful.

In North San Juan Santa takes the form of a little old Chinaman, who goes about from house to house bearing small gifts for each member of the household. Candy for the children, handkerchiefs for the "lalis" and cigars for "Bossy man." "Smiley" is a familiar sight in San Juan having come there as a young man he is now past seventy. Smiley helps in the households of the little community for a small sum coming early and staying until late. His wants are simple—a little rice—bacon and some ginger. His clothes are seconds often mere rags as he saves the best things—for what no one knows. Sometimes he has not enough money at Christmas then he borrows enough to buy his gifts. He then works diligently until every cent is paid off.

"Smiley" is the last of the Chinese village in San Juan but he does not lack friends. His cherful greeting each day is part of the residents day and will be greatly missed when he is called to his ancestors.

FROM THE CALIFORNIA STATE DIVISION OF MINES

The NUGGET received this week a copy of the AMERICAN MINING LAW by A. H. Ricketts. The book contains 810 pages printed on thin paper and is nicely bound in black leather. This book represents the labor of seven years on the part of the author who commenced the work when he was seventy five years of age. Realizing that he was living on borrowed time and wishing to leave behind him a worthy monument, Mr. Ricketts approached the State Mineralogist and offered to compile such a work without compensation provided they would print it. The consent was given and the result is surely worthy of the mining fraterity. As a result Mining Law may be purchased for the small sum of $2.00 whereas it would otherwise cost at least $10.00. It should be in the hands of every mining man, prospector and attorney. The Mining Association of California at their meeting last meeting last Saturday passed a resolution commending Mr. Ricketts for his splendid work and the entire mining industry owes to him a debt of gratitude.

Which reminds us of another gift we recently received from our good friend James D. Stewrt of Auburn. A copy of Lindgren's report on the Tertiary Gravels of the Sierra Nevada of California which is now out of print. We have had many calls for this report and are very grateful to Jim Stewart.

MERRY CHRISTMAS TO EVERYONE

Mr. and Mrs. Ray arrived Tuesday evening to spend the holidays with Mrs. Ray's parents, Mr. and Mrs. Fred Breece.

Scott Rundy, who is attending College of the Pacific at Stockton, is home with his parents over the Christmas holidays.

MINING IS ACTIVE IN MOHAVE MINING DISTRICT

Leasing in the Mohave mining district, is proving more profitable since the well meaning prospectors looking for a lease began to realize that much depends on the little gold pan. It makes no difference how low the poor ore, so-called, panning must be kept up, or good milling ore will be thrown over the dump. For instance, a panning of Cow Boy mine ore, made from the ore pile in most camps would be considered, say $10 to the ton, in this instance, the ore would run as well as $50 to the ton, for the reason the metal is heavier, running as good as $18 to the ounce.

Leasers are spreading out, that is, blocks of ground on the Desert Queen and the Calkins holdings are now being worked by leasers, all with good showings. Ed Wolff, Louis Neil and Herbert Lank, leasing on the Hopson ground, have a goodly bunch of free milling gold ore. Pat Wolff, adjoining, is now bringing in a hoist and other equipment for his block.

Tom Franks, one of the long residents and leasers generally working by himself, secured a lease on the Desert Queen, "just to help out four idle miners", fortune favored them, and they are now in for many prosperous days. Adjoining this shaft, A. L. Greenleaf, prospecting from the surface has good indications of making ore. W. Lions, closeby is putting in some good hard work in a cave near, a glory hole that in the early days, was considered a sensation in gold mining

A short distance south, R E Whitaker, Wm. Smith, H Menard, are sinking on the Gulch claim, with good prospects. Less than two months ago there was only one outfit on the mountain facing the Los Angeles-Mohave paved highway. One of the sweetest leases is the Emerick on the Exposed Treasure.

The Sweitser, lease adjoining have good ground on the North Exposed Treasure. Roun Bros. are successful leasers on the Exposed Treasure holdings.

Fisher and Miley, have a large tonnage for the Elphant mills next run. T. L. Brite on the Red Rover, with a couple of miners has shipping ore ahead. C. A. Heyn is one of the steadfast leasers and is about as well as as to good pickings as any of the old timers in the district.

Bert Wegemann and Ben Landis, leasing on the Cow Boy mine have two ore piles, one of 5 tons and the other some 20 tons, with plenty more a comin.

Four young miners from Los Angeles have been granted a lease on the Excelsior claim. There are a number of other leases to be visited.

Weather conditions and frozen water lines have interfered with the Elephant mill running steadily.

The Burton brothers, with but little exception have handled all of the milling ore, in their Tropico mill, not only for the local district, but for many outside districts. They have the lease on much of the Standard group. C. A. Heyn, likewise, both sub-leasing to experienced mine workers in that branch of mining.

ANGELS CAMP MINES ARE TO BE REJUVENATED

Reports are that a group of California and Eastern capitalists are preparing to take over and rejuvenate the famous Lightner and Utica mines at Angels Camp. The old producers will be provided with modern equipment, workings deepened, and arrangements made for reduction of the large reserves of low grade ore known to be in the old areas of both properties.

The Santa Rosa Mines Development Company is preparing to increase its working force from fifteen to fifty men at the mines near Keeler. J. R. Le Cyr, president and general manager, states the company is shipping a carload of rich silver-lead ore weekly, and that developments and production will be materially increased early next year.

Evelen veins have been demonstrated in the extensive acreage, and the main ore body has been oppened for more than 200 feet at a depth of 350 feet. The old distillate-driven equipment has been replaced by powerful machinery powered by 120 horsepower semi-Diesel engine.

UNLAWFUL TO IMPORT FISH INTO CALIFORNIA

It is not only unlawful to import live species of fish into this state from other states and countries, but it is also against state laws to transport live fish from one body of water to another, it was announced by John L. Farley, executive officer of the Division of Fish and Game.

This also applies to eggs of species the state official said, and proper authorization must be received from the Division of Fish and Game before such introduction is undertaken

Undesired species have been introduced into many waters in this state through carelessness on the part of some individual, Farley said, and such introduction not only created nuisances but, in some instances, tended toward the destruction of good fishing. Obstinate and expensive problems are often created by such thoughtlessness and in many cases a practical solution of control of a species is almost entirely lacking.

If any organization becomes interested to the point where introduction of a "favorite" species is contemplated, the matter should immediately be studied with fish culturists of the Division, the executive officer said.

The Division of Fish and Game maintains 29 excellent fish hatcheries in California and is progressing splendidly in fish culture operations. Dr. J. O. Snyder, of Stanford University, has been added to the staff of the bureau of fish culture and will supervise the administrative details of this important work.

Low water during the past season has, in many instances; enabled the Division to make reasonable progress in the battle against "rough fish", Farley said, and if the angling public will use caution in carrying live bait and otherwise cooperate in the work, much ground will have been gained.

KAAK TO HUNT FOR A FAULTED VEIN

RANDSBERG —George S. Kaar, a capitalist of Bakersfield, and owner of two patented groups, Santa Ana and the Gold Coin, with gold prduction records far in the six figures, is now making the first go trying for the famous gold vein that faulted on the 500 foot level. Mr. Kaar, proposes to contract for a piece of advancement 42 feet westerly from the old bottom workings. So that this work can be done with safety and at the same time, give the local miners a chance to bid on it, an examination will be made that will give a good idea what the cost will be. Work has strated by one set of miners, now going over the hoisting machinery.

Indications in the face of the proposed contract, shw pieces of quartz similar to the Gold Coin vein strong enough to warrant this advancement. A successful find at this depth, will mean that other claims in both of the groups will be prospected below their workings.

Mr. Kaar has spent a large sum of money exploring the upper workings since acquiring ownership of the old mines.

PROFITABLE GOLD MINE

Downieville, Sierra Co., Produced 1½ million dollars. $16 ore. Free water power; timber; good roads. Engineer's reports and maps. Small payment, easy terms. Would retain third or half interest.

MT SHASTA MUD FLOW IS BEING STUDIED

Uncle Sam has decided to step in and see what can be done to curb the turbulent spirit of Mt. Shasta's famous river of mud.

Intermittently, during the years, old Shasta has spewed forth a great mud flow that swept out of its path, carried immense boulders along as if they were chips of wood, ruined roads, bridges and whatever else stood in its way an temporarily despoiled fishing in the McCloud River. But this may end in the near future.

Major J. R. D. Matheson, in charge of the Sacramento district office of the United States engineers, received orders from Washington to make an investigation of the mud river to determine what can be done to control the flow.

Engineer R. L. Egenhoff of the local office has been detailed by Major Matheson to make a study of the mud flow and gather data to be used when an official report is submitted to the chief of engineers in Washington.

Egenhoff said he expects to complete his survey by the first of January. He has requested officials of the McCloud River Lumber Company, one of the heaviest sufferers from the mud flow, to ask any persons knowing of Shasta mud flows prior to 1920 to write details of their observations and send them to the Sacramento office of the United States Engineers.

One of the principal questions for which Egenhoff hopes to find the answer is what relation, if any, there is between weather conditions and the mud flow.

Egenhoff said there apparently is no feasible way in which the flow of mud can be stopped, but that the data he gathers will be used in trying to find out how the mud flow can be controlled with a minimum of damage.

25,805 DEER SLAUGHTERED DURING HUNTING SEASON

SAN FRANCISCO, Dec. 17.—Deer taking during the past hunting season totalled 25,805, according to figures tabulated by the bureau of refuges of the division of fish and game. This shows an increase of 1673 more than were taken during the season of 1930.

Counties in which more than 1000 deer were killed include Mendocino, 1,706; Siskiyou, 1,516; Modoc 1,486 and Humboldt, 1,069.

Out of the entire 58 counties in this state only two were registered where no deer were taken—San Francisco and Imperial counties. Sutter county holds the low record of but one deer bagged. Sacramento runs a close second with a grand total of four bucks on record. The remainder of the counties range from 10 deer on up to well above the thousand mark.

Such a successful season reflects not only the practical results of sensible legislation and effective enforcement, but also indicates that sportsmen are giving their full support to the protection of these big game mammals throughout the year, division officials said.

Do You Know?

There are three thousand two hundred and eighty five licensed Chiropractors in California and they are caring for sixty five per cent of the sick and afflicted without the aid of Hospitals, School Nurses or appropriations.

If you have not experienced and learned the valuation of Chiropractic spinal adjustments for any and all ailments the human body is subject to, then that is just too bad.

Here is a chance for you, commencing next week I will give my services free of charge three afternoons from 1 P. M. to 4 P. M. on Monday, Wednesday and Friday.

If you will come in during those ours I will give you a thorough examination, including, blood pressure test, spinal analysis and one complete adjusting.

I am doing this that we might be able to say that there is not a person in Nevada City who does not know what to do at the first sign of illness

NEW ORE VEIN FOUND IN THE BENDER MINE

Another rich streak of ore three inches carrying values in the three figures was made recently in the Operator Consolidated Mines, Inc, Bender mine, located just off of Randsburg's main th.oroughfare

When the company decided to run another up-raise on the 100-foot level, 100 feet from their main shaft, the ifrst shots opened what may prove to be a vein. A little bit of faith carried out on the part of Superintendent Gustav Bender was evidenced, but the "hardrocks" had been more skeptical as they advanced. One of the miners, however, picked up a chunk of rock laying on the waste and was "nearly knocked over" when he saw free gold plastered all over the rock. No time was lost in getting Gustav down to the find.

In a little while the picks brought in a well-defined vein of three feet.

As the character of the ore is of a granulated quartz in the schist, similar in every way to the rich find made on the 40-foot level, which milled all ore matter sent up at $25 per ton, there is no question but what the new find will make at least the same values.

The Bender mine was brought in on October 16 one year ago, and has paid its way handsomely from the very grass roots. Thus far nearly the sum of $15,000 of ore has been extracted. Being strictly a free gold milling ore, and the corporation owning their own stamp mill, a better and cheaper reduction will be had in handling the product.

The new find is due north of the mine, and bears out Bender's idea, who believes that in time the rich ores will be found westerly from where they are now digging.

In the successful No. 1 raise to the top of surface, pure air circulation has been made in all of the underground workings, which will be most beneficial to deeper sinking.

Superintendent Bender states that for the month of November 210 tons of ore had been extracted and sent to the Operator Consolidated Mines mill at Johannesburg.

The new discovery should be the means of bringing in prospectors seeking ground nearby for leasing. Three sets of leasers, two on the Bing Hole claim and one on the Lillian V. are setting a goo dexample by their steady work in prospecting their blocks.

—0—

MINING IS PRONOUNCED IN EL DORADO COUNTY

Peck & Son of Los Angeles have taken over the Louis Hoskins mine in the southern end of Greenwood. A half mile of road sah been put in and grading is now being done for a 250-ton tube mill

The old Welch Mine near the cemetery has been bonded to V. Miner of Santa Barbara. A crushing of ore from the dump proved the value of this property, and machinery will be installed for further development.

A. E. Winn is having a crushing of ore from the old Revenge Mine, now called the Gilt Edge, made in the three-stamp custom mill on the French Mine, in the western paprt of Greenwood

C. R. Stewart, who has been prospecting in the vicinity of Greenwood for the past year or two, has purchased the old Gaydon claim of Clifford Cheek, and with Frank Wilkinson and Elmer Kunezey of Georgetown will spend the winter prospecting there.

H. C. Wright, San Francisco mining engineer, has charge of operations at the Sliger Mine, below Spanish Dry Diggings, which has recently been bonded by C. L. Wright, eastern capitalist. The shaft, which had caved to the 150-foot level, is being cleaned out and preparations are being made to sink a winze from the 500-fot to the 600 foot level. The mine is working two shifts.

William R. Maloney of the Kelsey Mine has bonded the Alpine near Georgetown and is opening up the shaft.

S. W. Collins and Frank Brown are running ore from the Marigold, near Garden Valley, through the Frog Pond mill adjoining this property.

HOLLY COMPANY WORK IN LAST CHANCE CANYON

A nine foot by nine foot tunnel through the center of an 18 foot vein of pumice has been started by Holly Chemical Company, on their Calsilco mine, in the Last Chance Canyon. This piece of mining will give them a 500 foot back. The material from the deposit on being refined makes a remarkable cleanser, for the first by-product is a material for a standard acoustic plaster.

In the near future it is the intention of the company to install a mill at the mine. For the present four cars per month are being shipped out. The output is now hauled by truck to Cantil station, on the S. P. Jawbone system. In company with George W. Reynolds, local manager, on a visit to the property, were D. B Randolph, Bob Randolph and Oscar Larson, all of Los Angeles.

With two all the year around plants in the Last Chance Canyon, mining on non-metalics will draw attention of prospectors and investors to the many possibilities of the northwest end of the Rand mining district

YOU CAN serve the turkey croquettes next week *if you have an electric refrigerator*

An electric refrigerator saves $50 to $150 a year on food

NO LONGER is it necessary to eat left-overs the next day or not at all. The electric refrigerator enables you to serve them in style days later. It eliminates waste by preserving food properly.

With an electric refrigerator you can take advantage of week-day and Saturday "specials" and buy large quantities of food. The electric refrigerator keeps food perfectly.

According to careful shopping tests, here are the savings that can be made in the average family of four where there is an electric refrigerator:

	Weekly Savings	Monthly Savings
Dairy Products	$ .12	$ .50
Vegetables	.85	3.30
Fruits	.40	1.60
Meats	.50	2.00
Elimination of waste, 10% of month's food bill		3.35
		$10.75

These savings amount to $129 a year. Food experts agree that every home having an electric refrigerator can save from $50 to $150 a year.

Let the *dealer* who handles electric refrigerators give you a demonstration.

EIGHTH HEALTH ARTICLE WRITTEN BY CRONWELL

Article eight of a series of health articles written each week by Dr. B. G. Cronwell, chiropractor and food specialist, formerly of San Francisco and now of Nevada City.

This being my ninth week in Nevada City, I have had time to visit every little nook and corner of this little city nestled up here in the hills and mountains where he should be hard to do[illegible] I never drink any water and can not praise the city water from its source I can surely judge it from the feel in my daily bath. The softness imparts that same softness to the skin and hair. I have also investigated the source of your supply of water and find that it is mountain spring and melted snow which is the very best water a city could possibly supply the public.

We can live two or thre months without food, but water and air the body must have to function at all and although the writer is never seen drinking water fro ma glass or any dirty water which is my opion of tea, coffee, and all such liquid drinks, so goodly supply of water is supplied his body through the use of raw fruits and vegetables. This is the finest water in the world and is just the same in the largest most crowded city in the world as it is here in Nevada City, or any other mountain town that might claim to have a more perfect water. For this reason the writer can gamble all his possessions that he will not see a sick in 1932 and all the years to come as long as he continues to live right.

It is quite surprising to the writer, that with all the pure fresh air and water, Nevada City is gifted with, there is a bigger percentage of sick people here then we will find in some of the lower so called unhealthy valley towns. Rheumatism seems to be the condition which is causing the most distress to those who have lived here for any length of time. Some of the worst invalids the writer has ever treated are confined to their homes and most of them in a bed or chair where they have been for months some for years.

This is a serious matter and should have the attention of every person who is intending to make Nevada City their home. The future looks pretty dark to hundreds who are just starting to have the first little sharp shooting pains and picturing themselves as helpless invalids within the next five years. You must remember that all of these present day invalids will tell you that their first pain started in a finger, wrist, hip or leg and every remedy they tried seemed to do no more good than pouring cold water over the affected parts.

The writer was a sufferer with rheumatism for eleven years of the very best part of ones life, from the age of nineteen to thirty one. It took ninety days to remove every trace of rheumatism and it has never returned. Now I boldly make this statement and will be right here to back it up. It is not necessary to have rheumatism any more than it is to wear a red neck tie. If you have rheumatism in any of its stages, it your fault not mine, nor can you blame it on to working in a cold damp place. Only children can blame it on to parents for their conditions as the parents are usually responsible for their ways of living. Rheumatism or any other condition of distress is not inherited from ones ancestors. Diseases are not born in a person. Only tissue structure is inherited from ones ancestors. In making a careful study, to determine the cause for so much more rheumatism here than other places that seem to be inferior places to live, I have to take into consideration that people are out of dors more and get a great deal of out door exercise which always develops a large appetite and the combination of wrong foods will develop rheumatism and other sickness in every person with a slowed down elimination. Although my intentions were to stay here only sixty days which time would be up the twenty fourth of this month, I have decided to return to San Francisco and make arrangements at my offices that I may return and remain here for at least ninety days of the New Year and do all that I can to relieve some of these rheumatism sufferers. Some ten cases have been listed to begin with. I will continue to write these articles and do all that I can to educate our readers so that they may be able to avoid sickness that we may use our time for those already afflicted. At this time I would like to ask some of your folks who are reading these articles every week and who appreciate them if you would take just a few spare moments to write a few lines of appreciation to the editor of The Nugget for permitting these articles to reach you every week. If you are not a regular subscriber for The Nugget your home paper, why not make that one of your New Year resolutions to subscribe for the paper for 1932 or make some one a Christmas present of a year's subscription..

Mail in your questions, help me a little and I will help you more. We can establish a health school to meet once a week, with just a little effort on the part of a few people who are interested in seeing every [illegible] enjoying health.

Question—What is the cause of sinus trouble? Mrs. B.

Mrs. B—Sinus trouble is only an advancedcatarrahl condition and it is a serious mistake to open them up or probe up into them and break up the spongy bone tissue to drain the sinus cavity. The cause of the catarrah should be removed. The presure must be removed from about five nerves along the spine and a simple change in the daily diet.

Question—Can a goiter be cured without operation? Mrs. S.

Mrs. S.—Tthe advice I just gave for the sinus trouble will take care of all throat trouble and soon reduce goiter and large glands.

RAY DAVIS IS TAKEN TO S. F. HOSPITAL

Ray Davis, who has a responsible position with the Tahoe National Forest, was operated on Sunday at the Nevada City Sanitarium for an infected leg.

His condition was not as favorable as should be and he was taken to San Francisco to the new Marine Hospital to receive all possible care.

His many firends hope for him an early recovery.

Mrs. Davis and daughter, Catherine, accompanied him to the city.

C. E. Winney, poultryman on the Tahoe Ukiah highway is quite ill in the Nevada City Sanitarium.

CHARIVARI IS GIVEN TO NEWLY WED COUPLE

A real old-fashioned charivari was given Fred C. Kendall and his bride, the former Edith Horwege of Forest Hill, upon their return from Reno where they were married recently.

Approximately 30 persons gathered about the Kendall home, started the usual terrific by pounding on tin cans, etc., and were finally admitted to the house, where old time dancing was enjoyed, with music furnished by Ed Lang, harmonica; Charles Packard, trumpet, and John Williams, accordian. Virginia reels and quadrilles were favorites of the frolickers and Al Youngblood called for the dances.

Accordian solos were played by J. Williams and Dorothy Mark, and several trumpet solos by Charles Packard.

Friends present to congratulate Mr. and Mrs. Kendall were, Mesdames Margaret Hamilton, Grace Peterson, S. F. Price, Harry Deal, S. Calvin, E Lang and Mosher; Misses Katherine Pauly, Thelma Lang, Esther Lanf, Anna Lang, Dorothy Mark and Dorothy Hays.

Leo Thomas, Dave Lewis, Al Youngblood, Jim Halkyard, Fred Wooley, J. Williams, Jean Williams, Ed Lang, Junior Longley, Jack Zaring, Frank Walgamott, W. Chapman, Erle and Warren Pauly.

Bobert E. Carr and Wm. Maxwell spent Monday in Dowieville in the interests of his shoe store-

Miss Ruth Tamblyn, student at San Jose teachers college, and Miss Dorothy Tamblyn, who is attending College of the Pacific, are at home with their parents, Mr. and Mrs. W. V. Tamblyn over the holidays.

SEVENTH GRADE PLAYS SANTA CLAUS TO NEEDY

The seventh Grade of Grammar School under the direction of the teacher, Miss Doris Nightengale, played Santa Claus this week to a large family which recently came to this city in a destitute condition.

A menu planned that would do credit to any family as follows:

Fruit Salad

Consisting of pineapple, apples, oranges, bananas, nuts and lettuce.

Vegetables

Carrots, hominy, baked potatoes.
Turkey with oyster dressing
Cranberry Sauce
Cele.ry, olives
Squash pie.

The children brought all the materials for the pie, including flour lard and spices.

Besides the diner they brought a tree and all of the trimmings and presents for all of the seven children

Surely the seventh grade children and their teacher deserve the happiest Christmas ever.

Miss Emily Davis, County Health Nurse, assisted in playing Santa Claus.

GREETINGS OF THE SEASON

The undersigned progressive business men of Nevada City extend to one and all their best wishes for a very Merry Christmas and trust that the year just closing has been a joyous and prosperous one for you and yours. May great abundance be yours throughout the coming year. May our city and community progress in large measure due to the increasing interest being taken in our boundless mineral resources which have made Nevada City known the world over.
